

**ANNUAL REPORT** 

January – December, 2019

### **Highlights by the Coordinator**

IPFG has been supporting poor and vulnerable people to achieve their sustainable development through different interventions, even if there is still a long journey to undergo. External supporters' requirements and their priorities are changing day to day due to changing context. IPFG considers its role to be played to contribute to achieving sustainable development Goals (SGDs), National strategy for Transformation (NST1) and other programs aiming at improving wellbeing of Rwandan Society.

This changing context shows us the key areas to consider in our development journey including

compliance with supporters' requirements, livelihoods of the target beneficiaries; gender gaps; Gender based violence (GBV) and conflict resolution in the families and citizens' participation at local level.

The year 2019 has been a significant one from IPFG's creation where in terms of program impact, it reached 4,376 direct program participants which was a tangible increase from 881 program participants reached in 2018 and annual sealing increased from 91,681,001RWF in 2018 to 113,693,493RWf in 2019. IPFG elaborated a new 5 years strategic plan and new policies to guide its future interventions.

Looking ahead for the year 2020, we will enforce the implementation of IPFG's current strategic plan 2019-2023 while adapting on the changing context. I would like to thank all our supporters; program participants; partners and staff who continue to be committed to contribute to delivery of IPFG's strategic plan to ensure a democratic society and resilient communities.

<b>4,376</b> Direct program participants reached in 2019	<b>5</b> Years strategic plan 2019-2023 elaborated	2020 IPFG will enforce the implementation of its current strategic plan

### **BRIEF SUMMARY OF IPFG**

IPFG is a non-governmental organization created in 2002 and legally registered by the ministrerial Order N<sup>0</sup> 17/11 of 31 January 2006 which was published in the Official Gazette of the Republic of Rwanda O.G N<sup>0</sup> 10 bis of 15 May 2006.

**Vision:** IPFG aspires to a democratic society where both women and men are aware of their problems, complement one another and actively participate in the actions of the entire development

**Mission:** To promote and reinforce complementarity between man and woman as well as their participation in the actions which aim to achieve social and economic development based on fairness.

It is based in southern province, Nyamagabe District, Gasaka Sector and operates in 3 Districts namely Nyamagabe, Nyaruguru and Nyamasheke. Its priorities over 5 years include improving the livelihoods of the target beneficiaries; promoting gender, fighting against GBV and conflict resolution in the families; promoting citizens' participation at local level and strengthening its institutional capacity. IPFG has supported more than 10,000 poor and vulnerable people over the past 18 years. Currently in 2019, IPFG supported 4,376 direct beneficiaries where it contributed to SDG 1(no poverty); 2 (No hunger); 5 (gender equality); 13 (climate action); and 15 (life on land).

IPFG is one of founder members of IPC, "Initiative pour la Participation Citoyenne" a network of 5 local NGOs strengthening citizens' participation through imihigo cycle. It is also a member of RCCDN, Rwanda Climate Change and Development Network, that strengthens the implementation of nationally determined contributions (NDCs) and other amendments with regard to climate change to which Rwanda is signatory.

## **Our work**

## Direct implementer

Our theory of change focuses on (1) Individuals as they need to be supported to have the resources, skills, knowledge and confidence to live a life of dignity and secure their basic rights; (2)Communities as they need to be mobilized and (3) leaders and (4) influencers need to be engaged to build sustainable and resilient communities

theory change

#### Citizens

- Increasing knowledge and awareness about different policies;
- Increase awareness on engagement and the benefits of engaging with different policies
- Increase awareness of individuals' environment and priorities

#### Local governments Leaders

Increasing capacity and skills in inclusive and participatory planning and budgeting

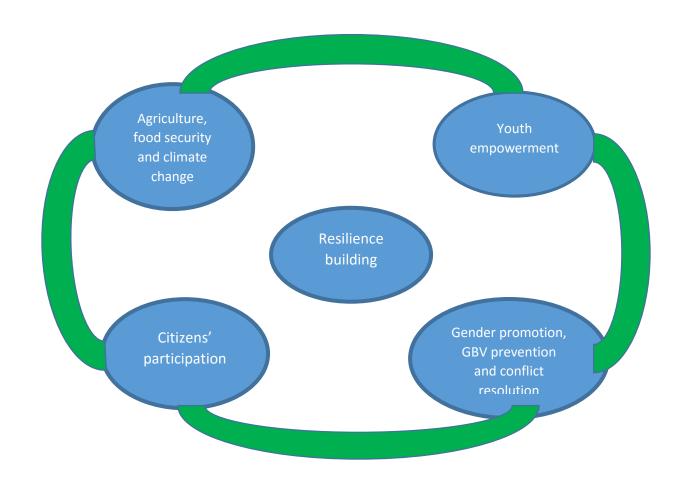

#### Communities

To increased citizens' involvement in different policies; Supporting and strengthening feedback mechanisms between communities and local authorities; Enabling communities to analyze different policies; information sharing and policy dialogues and increase capacity of communities to perform food security vulnerability analysis and propose corrective actions.

#### **CSOs**

Facilitating exchange of expertise in different domains.

# IPFG'S APPROACHES TOWARDS RESILIENCE BUILDING TO TARGETED BENEFICIARIES

Our targeting Approach

- ✓ Ubudehe category 1& 2 and few from Category 3 confirmed in public by their neighbours;
- √ Female households (FHH);
- ✓ Child heads household (CHH);
- ✓ Elderly

IPFG implement different projects to build the resilience of the targeted beneficiaries such as an individual organization and through consortium. The key deliverables under each project are summarized below:

### Projects and respective key deliverables

## **Project**

Improving resilient livelihoods for rural population especially women living in Nyamagabe District,

## Key deliverables

- VSLA groups establishment and support;
- Promotion and provision of drought tolerant crops;
- Rainwater harvesting;
- Agroforestry;
- Promotion of energy-efficient stoves;
- Bio-intensive agriculture promotion
- Small Livestock promotion;
- Promoting off farm activities:

#### Funded by IRISH AID via Trōcaire

Enhancing the capacity and participation of small-scale farmers and civil society organizations in decision making and governance processes related to sustainable agriculture and food security in Rwanda

- Training and awareness raising on agricultural policies, strategy, the role of agricultural committees and citizen engagement
- Strengthen and support agricultural committees in their roles as the main engagement mechanism between farmers and authorities
- Locally held organizational management covering financial management, governance and organizational development (through planning and coordination meetings; interaction meetings and accompaniment visits to the farmers)

Co-funded by European Union and Trōcaire

Project

Key deliverables

Reveille project

Strengthening citizens' participation in imihigo cycle.

### Funded by GIZ through IPC

## **IPFG**

- General assembly meetings;
- Board members meetings;
- Purchase and use of new office;
- Elaboration of new strategic plan 2019-2023.

Under IPC, "Initiative pour la Participation Citoyenne"

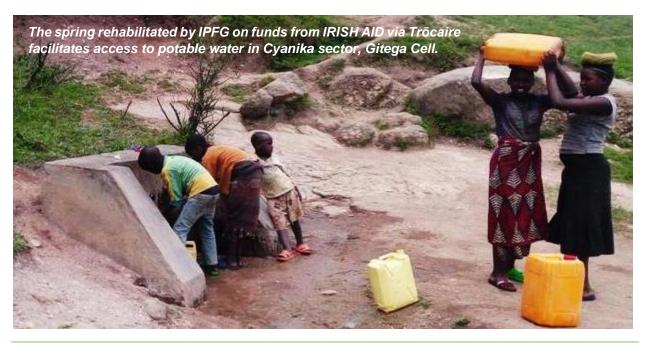

- General assembly meetings;
- Board members' meetings; Final evaluation of imihigo 2018/2019 **In**

Nyamagabe; Nyaruguru and Nyamasheke Districts

Citizens in Kitabi Sector participating in evaluation of imihigo of their Sector.

## Our results at glance

Tangible changes in the context (Political, social-economic, climate change, etc)

Under IRISH AID funded project, through the project entitled" Improving resilient livelihoods for rural population especially women living in Nyamagabe District, Cyanika sector." There was positive different changes regarding *political will, improvement of social economic conditions of the targeted beneficiaries and also climate change resilience*.

In fact, the involvement of local authorities in the project activities was much appreciated , where for example they support in monitoring of the project benefits provided to the beneficiaries(*E.g.* they returned back the pigs sold by one of the beneficiaries; provision of plots on which nursery trees were installed (in Gasharu and Munyereri villages)). They have also participated actively in joint monitoring, where they organized community works and consulted IPFG for proper organizing of the event and this was observed to be fruitful.

With regard to social economic condition, targeted beneficiaries have improved their socio-economic conditions through the following ways:

- Use of loans from saving and loan groups;
- Sells of vegetable harvests;
- Small livestock provided in Gitega cell (139HHs were directly provided with pigs and 86HHs received them through pass on system, which make total of 225HHs whose pigs).

Beneficiaries in Gitega cell are happy that they are going to obtain farm yard manure to contribute to increase of their agricultural production and income too.

(e.g. on the average, 1Pig can farrow 6 Piglets, 2piglets are provided through pass on system and 4piglets can be sold or kept for continuous reproduction).

 The targeted beneficiaries particularly women are no longer fear to initiate small businesses

This resulted from the trainings provided to them regarding *elaboration and* management of small income generating project and the financial support provided especially to women. From 2017 to date 125beneficiaries were trained and 14 of them were provided with financial support to strengthen and initiate their small income generating projects.

#### • Community educated in climate change adaptation and mitigation

Regarding Climate change resilience, targeted communities have increased skills in

climate change impacts and ways to adapt and mitigate them. This was achieved through educating 8targeted communities (Villages) including 4new supported in year 3.

In addition, to date communities are engaged in climate change adaptation and mitigation as now they are implementing the climate change adaptation plans elaborated by themselves.

#### Review of the progress made since 2017 to date

IPFG intervened with integrated program where there was progress in different areas and tangible results are being observed.

Targeted farmers were educated on different practices used for soil fertility management and are implementing them on field. Demonstration plots were established where beneficiaries learn by doing. Erosion control, crop rotation, mulching, agro-forestry planting were the main topics discussed during the training in ISFM.

Practically, composts (5model composts) were produced and ready to be used in season B 2020; nursery trees were installed using banana bulks for trees bags making (ibihoho) for cost effectiveness. To date there are 3 new nurseries in Gasharu village; 1nursey in Gaseke village and 1 new nursery tree in Munyereri village.

In total we there exist 7nusery trees with 31,978 seedlings including 17,368 agro-forestry trees (Leucena, grevillea) and 14,610 fruit trees (Tree tomatoes, passion fruits, papaya) produced.
47.3Ha were planted.

➤ The targeted beneficiaries were also supported to access and use drought tolerant crops including vegetables and orange fleshed sweet potatoes.

High quality vegetable seeds (23Kg) including carrots, onions, and pepper and beet roots were provided to every targeted beneficiary. In addition orange fleshed sweet potatoes seeds (2,500Kg) rich in Vitamin A, type "Kabode" were provided 101HHs 3 in vear including (51FHHs & 50MHHs).

Photo Gitega Cell: Women taking their OFSPs.

Actually during year 2019, 1.83Ha of vegetable gardens were cultivated with different types of vegetables (Carrots: 39.7ares; Onions: 1.27Ha; Pepper: 8.8Are; Beetroots: 7.3ares) and these resulted in the following yields: Carrots 22.3T/Ha; beetroots: 19.2T/Ha; onions: 15.2T/Ha; and pepper: 1.8T/Ha. In addition, 1.5Ha of orange fleshed sweet potatoes were cultivated where on average 12.75T/Ha were produced (FHH: 12.87T/Ha and MHH: 12.64T/Ha).

These are supporting beneficiaries to improve not only nutrition status but also obtaining income from sales of vegetable harvests.

Rain water harvesting technologies were provided to the targeted beneficiaries for climate change and food security resilience.

## In total 112 water tanks of different types were installed at targeted household (63FHHs & 49MHHs).

#### These include:

- 80semi-underground and 16plastic tanks constructed in Gitega cell/Cyanika sector;
- 16SUGs¹ constructed in Cyanika, Kibilizi and Gasaka sectors to support poor families identified by the District/under RDF COOP initiative.

From the period 2017 to end of 2019, 315 different types of water tanks (SUGs; plastic tanks) were installed at household level.

Remember that 1water tanks harvest 10m3 for SUGs and 5m3 for bamboo and plastic tanks at once and this water is contributing to increase of agriculture production especially vegetables; hygiene in households, reducing time dedicated by water fetching by women and Children and soil erosion.

For this year 2019, installation of semi-underground tanks was done by using local technicians for cost effective purpose. All beneficiaries whose water tanks were trained in their maintenance to enable them have increased capacities to care, maintain and repair those tanks without depending much on other technicians.

#### Damaged water tanks were repaired

- 60 water tanks with damaged sheeting and
- 72 with damaged pumps were replaced.

This was done in Gitega and Kiyumba cells of Cyanika Sector to enable rain water harvesting for agricultural production.

Very old beneficiaries' housed were rehabilitated before installation of water tank.

4families (1FHH&3MHHs) were supported to rehabilitate their very old houses before installation of water tanks, where the project contributed to iron sheets; doors, windows and nails.

Livelihood alternatives were provided to the targeted beneficiaries to enable them initiate or strengthen their income generating activities

During FY 2019, 25persons organized in saving and loan groups were trained in elaboration and management of small income generating projects and this group was provided with necessary materials to improve management of the SLG; 44

-

<sup>&</sup>lt;sup>1</sup> SUG refers to Semi-underground tanks

provided with pigs and a learning trip was conducted in Rulindo District to Duterimbere NGO beneficiaries to learn from them different experiences in saving and loan groups management; managing small income generating activities, esaving and learning.

6women were provided with financial support to strengthen and initiate small income generating projects (in total 18people supported to initiate small IGAs from 2017).

The new group so called Twitezimbere Gaseke has initiated a kind of project regarding fruit production (Passion fruits and tree tomato) where to date they leased 0.5Ha for 4years and now 0.3 Ha are fully planted. More follow up will continue to help them obtain expected productions.

- Communities are taking actions to proactively address the impacts of climate change
- After being educated on their impacts and way to adapt and mitigate them, action plans were elaborated by the communities and are implementing them. This year 2019, 4 community action plans were developed and are under implementation in new targeted villages (Butare, Musasa, Gitega, Kigarama).
   From 2017 to date 8action plans were developed and are under implementation.

Key actions under implementation under those action plans include:

- Rehabilitation or creation of progressive terraces;
- Springs rehabilitation;
- Rehabilitate or create water channels along the roads;
- Maintenance of roads and bridges;
- Agro-forestry planting; potable water supply through WASAC.

The involvement of the beneficiaries was appreciated where during implementation of their action plans (Rehabilitation of spring; Rehabilitation or creation of progressing terraces; and rehabilitation of channels along the roads), community contributed their 1/2day and the project contributed 500Frw per person per day as periderm.

Community works organized and 2,113 trees were planted includina 1,222agro-forestry trees (Leucena & Grevillea) and 891fruit trees (Passion fruits and tree tomatoes). appreciate the involvement of local authorities in this activity. This was the opportunity to contribute implementation of Gasharu holistic landscape plan.

➤ Holistic landscape planning was also strengthened in 1 pilot village commonly known as Gasharu where Community conducted mapping on the existing usage of natural resources and come up with (1) Updating the maps previously done with incorporating holistic landscape aspect; (2) Action plan for landscape restoration focusing on natural resources management and use; (3) Implementing the new action plan developed. The plan was composed of about 19actions organized in the following main key actions.

#### Key actions in their holistic landscape planning include:

- Natural resources management:
  - 1. Rehabilitation of the spring;
  - 2. Advocating for water line in that village to enable access to potable water;

#### Natural resources use

- 1. Support to rehabilitate 4houses effected by disaster;
- 2. Support in construction of Gasharu village office to enable service delivery and learning(There will demonstration plots of kitchen gardens; data sharing and storage, share on mapping processes, etc)

#### Soil management:

- 1. 7Ha of progressive terraces rehabilitated collectively;
- 2. 5Big composts were produced where people learnt by doing;
- 3. Mobilization to the community members to have composts known as "ingarani". To date 67HHs have composts well installed;
  - 4. Agro-forestry including fruit trees planting.

To date 11/19 actions are under implementation (Started).

Workload of firewood collection by women and children reduced resulting from promoting use of fuel efficient stoves.

This year 2019, the project supported in installation of 111 fuel efficient stoves "canarumwe" to families (57FHHs & 54MHHs).

Beneficiaries contributed in bricks making (made in clay and moody bricks known as "ibigigi") and man power during installation and those

efficient stoves. Note that 50% of beneficiaries that supported their neighbours in installation of stoves were females after being trained and considering their performance. Now the quantity of firewood used in 1day is used within 3days.

➤ In collaboration with RCCDN (Rwanda Climate Change and Development network), there was 1day session to share information on with Climate change platform members on policies and framework regarding climate change. Information regarding Paris agreements and other different amendments were shared and participants reflected on actions that need to be delivered for adaptation and mitigation.

### Key lessons

Lessons learnt Plastic sheetings used from 2017 up to 2018 was observed to be of low quality and this lead to replacement and use now polyethylene sheeting are being used from end 2019

Some of the targeted beneficiaries live in very old houses which required to rehabilitate them before installation of water tanks.

Some practices like agro-forestry promotion are conflicting with some policies like seed policy, monoculture promotion, chemical fertilizers' use, etc. which require more effort in advocacy.

#### Coordination and collaboration

During the project design, implementation, monitoring and evaluation, we collaborated with the beneficiaries, village, cell, sector and district leaders and CSOs for proper delivering tangible benefits to the beneficiaries to make them improve their livelihoods. In fact participatory approach has been considered across whole project cycle management.

We established the volunteers at village level where 1 volunteers monitor project activities in 4villages to facilitate and strengthen our monitoring system. These volunteers in addition to water committees' members (10persons/village including 50% females) enable the tracking of project progress from grassroots level.

Their monthly reports and quarterly monitoring sessions ensure that the project is well coordinated up the grass root level.

### **Accountability**

The project activities are explained for the population in the community meetings at village level, and also for local leaders to make them understand the project so as to facilitate us engage them in whole project cycle. The final beneficiaries are confirmed in the community meetings.

IPFG organized a meeting with Cyanika sector officials to show them the available budget for FY 2019 and plan together its allocation considering sector priorities. In addition IPFG used to share regularly different quarterly and annual reports with District and Sector levels via JADF.

Moreover, in case of loss or gain resulting from exchange rate, we notify Trōcaire and request for budget reallocation where necessary.

### **Gender mainstreaming**

**Setting time** to conduct the trainings considering the favorable time to facilitate women also to participate.

Provision of financial support to strengthen the initiation of small income generating activities considering more women to make them also capable to produce more as obtain an increased income to contribute to family's development. The same approach is also considered during provision of pigs to targeted beneficiaries.

In addition, water tanks provided, fuel efficient stoves installation and springs rehabilitated, all those contribute to facilitating women and children to reduce time allocated to water and fire wood fetching

### **Sustainability**

**Establishment of water committees and volunteers at Community level** in charge of day to day monitoring of the project activities at grass root level to increase the ownership of the project benefits.

**Community engagement:** Contribution of the beneficiaries for different project deliverables like in installation of water tanks (Elevation, roofing; levelling; digging hole to retain underground part of the sheeting; manpower, valuing 80,000RWF/water tanks), etc.

**Engagement of the local authorities** in whole project cycle has shown that they will sustain the project benefits even after the financial support is withdrawn. E.g. In Cyanika sector, they returned pigs sold by the beneficiaries

Training beneficiaries whose water tank in reparation to enable them do this themselves without hiring technicians. 112 beneficiaries were trained in the year 2019, in total 311 beneficiaries were trained from 2017 to date.

Training provided to the beneficiaries of fuel efficient stoves and the fact that some of them are supporting their neighbours in their installation at household level, shows that they will serve their community in these types of activities when needed. This year, 8beneficiaries (4females and 4 males) were selected in 4villages to support in installation of the fuel efficient stoves at household level.

### Challenges and way forward

No	Challenge	Way forward		
1.	Sheeting of lower quality led to their damages	Use of polyethylene sheeting of high quality		
2.	Damages of pumps on water tanks that hinder pumping for irrigation	Improve more protection of pumps		
3.	Seepage(amaninda) destroying some water tanks	Replace this damaged ones by Bamboo or plastic water tanks		
4.	Staff turnover that handicapped delay of implementation of the project activities	Quick recruitment of new replacer (Agronomist)		
6.	Cash less system cause delay to obtain money and different associated issues	Dealing with BK and MTN to solve this issue; Encouraging beneficiaries to have telephone and writing well their telephone numbers		

## STORIES OF CHANGE

IPFG through on funds from IRISH AID via Trōcaire has been supporting targeted poor and vulnerable people to construct various types of water tanks to help them to harvest roof rain water for vegetable gardening. Up to date 315 tanks were provided to 315 Households Gitega cell Cyanika sector from 2017.

**KAMANAYO Tharcisse** aged 43 years with 2 women and 8 children, one of IPFG's beneficiaries lives in Kigarama village, Gitega cell, Cyanika sector.

He received water tank, and vegetable seeds to grow in his field. As précised by Kamanayo, the water tank has helped him in rain water harvesting for his vegetable gardens especially in the dry period.

For this season he grew carrots on 1 are/acre where he harvested 250 kgs, and he sold 230 kgs for 300 Rwf/kg where he obtained 69,000 Rwf, and remained with 20 kgs for home consumption. He is proposing to purchase iron sheets to construct another new living house in the beginning of February/2020.

As précised by the executive secretary of Gitega cell, roof rain water harvesting for vegetable production contributed highly in increasing the vegetable production, and compared with other cells, Confirmed that, they are qualified as 1st cell in Cyanika sector as long as vegetable production is concerned. She added that there is still a need to provide other water tanks for the remaining population in the cell as many household still need them, and this should motivate them to produce vegetable production.

IPFG on funds from IRISH AID Via Trocaire has been distributing pig in Cyanika sector in Gitega cell as one of alternative source of income for households.

Form 2017 to date 138 pigs were distributed to 138 house-holds, especially women in different villages of Gitega cell. From that year, households have increasingly gained income from sales of some piglets, and farmyard manure especially for vegetable gardens.

**UWAMARIYA Grace** is one of the programme participants who benefited from pig. She lives in Musasa village, Gitega cell in Cyanika sector. She is a single mother aged 46, with 3 children. In 2017, she was provided with a piglet and in 2018 it started farrowing, where it farrowed 7 piglets.

Up to date her pig farrowed three times, where at the 2nd time it farrowed 5 piglets, and the 3rd time 7 piglets. Thus, she was able to give 2 piglets to his neighbor (in the community through pass on system), pay health insurance from 2018 which was very difficult to her, purchased a plot/parcel for agriculture purposes on 40,000 RWF and was able to purchase solar energy system (mobisol) where she pays 3,000 Rwf per month.

She remained with 3pigs at home and plans to purchase another plot of about 60,000Rwf to extend her vegetable production and from there she continues to gain farmyard manure for her vegetable gardens.

From the experience of rearing pigs in rural areas, it was found that this practice is very easy and fruitful for the rural HHs. But, considering the support of IPFG in that cell with around 1,173 Households, there is a considerable work to do, to help rural community to develop themselves and have various sources of income.

# Key activities to consider in next year 2020 under IRISH AID funded project via Trōcaire

- Provide education to targeted communities on soil management with a special emphasis on agro-ecological principles including agro forestry practices.
- ♥ Facilitate access to and use of the drought tolerant crops including local and exotic varieties with special emphasis on vegetables
- Provide rain water harvesting technologies to targeted communities and train them on related practices
- To focus on:
- Provide water filters for water tanks holders to enable access to potable water
- Provide awareness sessions in livelihood alternatives including off farm income generating opportunities for target groups, particularly women.
- Provide financial support to initiatives in off farm income generating opportunities, small livestock production and access to markets for target groups, particularly women.
- Train community groups on the negative impacts of climate change, the benefits of agro-ecology and the relevant policy frameworks related to NRR and Climate Change
- Provide training to communities on the impacts of climate change and support them to develop climate change adaptation plans
- Promote the use of fuel efficient stoves to reduce environmental destruction and workload of firewood collection by women and children within the target communities.
- ♥ Support climate change networks at district level to implement some of its actions planned in their action plan.

## Realizations under the co-funded project by

European Union

Enhancing the capacity and participation of small-scale farmers and civil society organizations in decision making and governance processes related to sustainable agriculture and food security in Rwanda

4080 Beneficiaries 10DAC Members; 153SAC Members; 119CAC Members 340 VAC Members; 340 FAG Members; 11CSOs

**Nyamagabe District** 

17Sectors

17Cells

34Villages

1. Increased space, capacity and engagement of citizens in agricultural policy development, implementation and monitoring

Community meetings to inform farmers about the project, identify the farmers who will participate in training and other key activities and establish Farmers' Advocacy Groups (FAG). 2,792 persons participated, a list of 4080 beneficiaries (2,534females & 1,546males) validated and FAG (Farmer advocacy group) was established across 34 villages. A total of 340 (157 male and 183 Female) FAG members are in place.

## Training at Cell level: includes CAC & VAC members and small farmers

With the aim of informing agricultural committees and representatives of small scale farmers on the content of PSTA4 and their roles and responsibilities, in total 460 participants including 213 males and 247 females were trained across 17 sectors and 17 cells and 34 villages of Nyamagabe District.

#### Supporting in conduct educational radio programs

The activity was led by CCOAIB, but IPFG supported in conducting a quick assessment on community preferences to track the preferences of the beneficiaries about radio stations and program to inform and facilitate planning the activity relating to Radio talk and call in through radio stations. **85farmers** (51females & 34Males) were interviewed in Nyamagabe District

## 2. Strengthened link between citizens and local authorities

2.1. Strengthen and support agricultural committees in their role as the main engagement mechanism between farmers and authorities

## Meetings at district level to inform DAC, SAC & CSOs about the project & identify participants for training and other key project activities

Local authorities and CSOs were committed to be more engaged in monitoring and supporting the existing and trained agricultural structures as well as sustaining their ownership and ensuring their adequate operational capacity and fulfilment of their responsibilities. *Key recommendations taken include:* 

#### Training on PSTA 4 at district level: includes DAC, SAC, CSOs

The training aimed at informing them (DAC,SAC and CSOs) on the content of PSTA4; explaining their roles and responsibilities and sharing with them the action plans and commitments made by trained agricultural committee members at Village and Cell levels.

They mentioned that they started to contribute to the implementation of PSTA4 but highlighted that farmers are not assisted as appropriate as there exist some challenges including Lack of postharvest facilities; insufficient lime for soil amendments, improper management of forests, soil erosion, Unavailability of animal feeds and difficulties in animal breeding system etc.

Participants decided that they are going to work closely with Agricultural committees from cell and village levels to improve agricultural sector.

#### Facilitate planning between VAC, CAC, SAC, & DAC

With aim of strengthening feedback mechanisms between farmers and authorities, representatives of VAC, CAC, SAC, and DAC members participated actively. As result, 1year action plans for every levels of agricultural committee (village, cell, sector and District) was developed.

#### Recommendation

organizing another session comprising of experts/technicians from DAC, SAC and CSOs for consolidating those action plans, and then validated by relevant authorities.

#### Planning and coordination meetings of DAC and SAC

2 meetings were held at sectors level in Mushubi and Musange and 1 meeting held at district level compring of DAc members and CSOs. The aim was to enforce proper monitoring and coordination of agricultural committees. Through these meetings 2SACs and DAC action plans were validated.

#### **Key recommendations:**

- ✓ Sector Agricultural committees should develop the operation plan based on the District action plan
- ✓ Start implementation their action plans.

#### Interaction meetings between DAC, SAC, CAC, VAC and FAG

It aimed at facilitating dialogue between government structures (DAC, SAC, CAC &VAC) with farmers 'Advocacy Groups (FAG); discussing about National Agriculture Policy and Roles and Responsibilities of Agriculture Committees.

#### **Key recommendations:**

Agricultural committee at all levels and FAGs should have a clear plan with SMART targets;

To prepare a dialogue meeting to discuss on what have been planned, challenges to face and sick possible solutions together

#### Dialogue meetings between DAC, SAC, CAC, VAC and FAG and small scale farmers

This aimed at promoting the involvement of significant number of Small Scale Farmers in discussion with agriculture committees from Village to District. Discussed points:

- 1. Progress made by the project;
- 2. Planned activities by agricultural committees (DAC, SAC, CAC, VAC) and FAGs after being assisted in different activities and
- 3. Challenges and way forward

#### The following are recommendations taken during dialogue meeting:

- 1. Agricultural committees especially at cell, sector, District levels should dedicate more time assisting farmers rather than taking much time in offices,
- 2. They should replicate what they have learnt to other villages;
- 3. DAC is should support in solving some of challenges that agricultural committee members have raised
- 4. Plans developed by SAC, CAC, FAGs and VAC should be implemented, DAC and SAC should assist their implementation as they are skilled and empowered;
- 5. Collaboration should be the key element of achieving roles and responsibilities assigned by agricultural committees;
- 6. Agricultural committee members at low levels (Sector, Cell and Villages) were advised to use the opportunities they have to reach farmers so as to fulfil their responsibilities.

# Accompaniment visits to the farmers by DAC and SAC and CAC.

The field accompaniment visits were conducted in Mushubi and Musange zones where the main objective was to facilitate field support and learning by agriculture committees for future planning through relevant agricultural structures.

Discussion and practices focused especially on banana management and rehabilitation in Musange sector while in Mushubi, they focused on passion fruits. In total 422 beneficiaries including 238 males and 204 females participated in this accompaniment visit.

#### **Key recommendations:**

- ✓ Lessons learnt from the visits should be more replicated to a big number of farmers;
- ✓ Agricultural committees have to extend their accompaniment roles vis-a-vis farmers

## Training on basic advocacy, lobbying & leadership skills for Farmers Advocacy Groups

The main objective were generally to build farmer groups with skills on advocacy, lobbying and leadership and specifically understanding the meaning of advocacy, both in theory and practice; understanding the communication strategy for effective advocacy and discussing on the role of farmers in the advocacy process, to solve agriculture-related issues in their respective communities.

- √ 10persons elected in each of 34 targeted villages as Farmers Advocacy Group members were targeted, and finally 335/340 (152 males and 183 females) participated.
- ✓ Participants have got more explanations on advocacy (basic skills of the advocacy, including definitions of advocacy, principles and its practices) so as to increase skills particularly the meaning of advocacy both theory and practice; communication strategies to be used during advocacy and define roles of FAGs in advocacy processes.
- ✓ The participants appreciated the training and committed to work closely with farmers in their villages so as to know the needs in advocacy.

#### Challenges and way forward

No	Challenge	Way forward	
1.	Too much agenda for local authorities	Planning ahead and more follow up	
	affects their availability and this led to		
	postponing of the project activities		
2.	Delay of some training materials(like	Discuss with Trōcaire to quicken the	
	training modules) led to delay in	process of production and availing	
	implementing some activities	training modules.	

#### Lessons learnt

The project requires to work more with local authorities while their availability is sometimes limited. So, planning ahead, proper communication and collaboration should be enhance.

## Institutional capacity building and compliance with donors' requirements

#### **Trainings to Board of Directors and management team**

- ✓ Members of Board of Directors were trained in Governance by Trōcaire
- ✓ Management team of IPFG have increased skills in different areas such as in digital data collection (Using Survey CTO, Comm Care); result based management, etc.

#### Policies, strategies developed.

- ✓ Strategic plan 2019-2023 developed.
- ✓ Travel policy developed
- ✓ Procurement policy developed.

# ANNUAL FINANCIAL STATEMENTS

For the year ended 31 December, 2019

#### 1. ORGANISATION INFORMATION

#### 2. REPORT OF THE MANAGEMENT TEAM

The management team of IPFG submits the financial statements for the year ended 31 December 2020, which show the state of the organizational affairs.

#### 1. ORGANIZATION INFORMATION

IPFG is a public non-governmental organization that was established in 2002 and legally registered under the ministerial order No 17/11 of 31 January 2006 and official gazette of the Republic of Rwanda O.G no. Bis of 15 May 2006. It is based in Gasaka sector-Nyamagabe District-Southern province. The founding members created IPFG after noticing that the 1994 genocide against Tutsi had caused so many consequences in the society among other things vulnerable groups including women and children. In that period, the organization was trying to assist some small women associations from former Gikongoro prefecture in combating poverty notably through farming.

In 2010 the members extended the organization's vision and changed its name from "Initiative pour la promotion de la femme de Gikongoro to "Initiative pour la promotion de la Famille et du Genre IPFG-initiative for family and gender promotion"

IPFG has a vision of promoting a democratic society where women and men are aware of their problems, complements one another and actively participate in the actions of the entire development. Its mission is that of promoting and reinforcing complementarity between women and men as well as their participation in the actions which aims at the social and economic development based on fairness

#### 2. PRINCIPAL ACTIVITIES

The principal activities of IPFG is to contribute to the entire development of the family where men and women are aware of their social and economic development issues and complement each other in the development of their families. IPFG contributes to these through development of innovative, participatory, sustainable and relevant social-economic development programmes through partnership with different donors and other stakeholders.

#### 3. MANAGEMENT

The management team who served during the year and to the date of this report is as shown in section regarding organization information.

On behalf of the Management Team

KANANI Faustin

Coordinator

Date: ... / ...... / 2020

3. STATEMENT OF THE MANAGEMENT'S RESPONSIBILITIES

It is the responsibility of the management of Initiative Pour La Promotion de la Famille du

Genre (IPFG) to prepare financial statements for each period, which give a true and fair

view of the state of affairs of the organization at the end of the financial year and of the

operating results for the year.

It is also the responsibility of the management team to ensure that proper accounting

records, which disclose with reasonable accuracy at any time, the financial position of the

organization. They are also responsible for safeguarding the assets of Initiative Pour La

Promotion de la Famille du Genre (IPFG).

The management team accepts responsibility for designing, implementing and

maintaining internal controls relevant to the preparation and presentation of the financial

statements that are free from material misstatement, whether due to fraud or error;

selecting and applying appropriate accounting policies and making accounting estimates

that are reasonable in the circumstances. They are also responsible for safeguarding the

assets of the organization.

The management team also accepts responsibility for maintenance of accounting

records, which may be relied upon in the preparation of accounts as well as adequate

financial and internal control systems.

Nothing has come to the attention of the management team to indicate that Initiative pour

la Promotion de la Famille du Genre (IPFG) will not remain as a going concern for at least

the next twelve months from date of these financial statements.

The management team acknowledges that the independent audit of the financial

statements does not relieve them of their responsibilities.

Approval of the financial statements

The financial statements, as indicated above were approved by the management team

and were signed on its behalf by:

**Faustin Kanani** 

Coordinator

26th April 2020

Clotilde Uwamahoro

Chairperson, Board of Directors

26th April 2020

At end of the period	=	10,318,888	19,775,442

#### 4.4 Notes to the financial statements

#### 4.4.1 Significant accounting policies

#### a) Basis of preparation

The Financial statements are prepared using accrual basis of accounting. Under the accrual basis, transactions are recorded in accounting records as they occur, regardless of the timing of the related cash flow. This means that those transactions are reported in the financial statements of the year to which they relate. Financial statements prepared on accrual basis inform users, not only of past transactions for which the related cash has been received or paid, but also of obligations or liabilities to pay and cash to be received in future.

#### b) Income

Income represents amounts received from donors and other development partners and revenue from sale of procurement bids, sale of fixed assets and other incomes. Income from donors and other income are recognized when the organization receives the cash in the bank.

Significant amount of the assistance given to the IPFG by the Development Partners is in relation to specific activities/ programmes. Hence, they are treated as restricted contributions.

Restricted contributions are recognized as revenue over the periods necessary to match them with the related costs which they are intended to compensate on a systematic basis. Grants related to assets are presented in the statement of financial position as capital francs which is recognized as revenue on a systematic and rational basis over the useful life of the asset.

#### c) Expenditure

The amounts shown as expenditure relates to the amounts spent on the organization activities during the year. Expenditure is recognized when it is incurred.

#### d) Cash and bank balances

Cash and bank balance consist of local currency maintained in the operating accounts held with local banks and other financial institutions.

#### e) Foreign currency translation

The functional currency of IPFG is Rwandan Francs. All receipts denominated in foreign currency are translated into Rwanda francs at the rate ruling at the time of the transaction. All expenses in foreign currency are translated into Rwanda Francs at the rate ruling at the time of the transaction.

#### f) Property and equipment

Fixed assets acquired during the year are capitalized and depreciated annually on a straight-line basis over their estimated useful lives as follows.

Buildings 5%

Motor vehicles 20%

Motorcycle 20% Computers 20% Furniture & Fittings 20%

### g) Reporting currency

The financial statements are reported in Rwanda Francs, being the currency of legal tender in Rwanda.

#### h) Trade and other receivables

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss when there is objective evidence that the asset is impaired.

#### i) Accounts and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.
